

## **Steel**

### **System Specialist**

PCI Systems, the Sheffield based software provider to the metals sector is delighted to announce the appointment of Richard Bulmer to the role of System Specialist.

Following completion of his Aeronautical Engineering Degree at Loughborough University, Richard has worked for over 10 years in Steel Stockholding and Processing, and brings with him a wealth of industry specific experience which will benefit both PCI Systems and their wide customer base.

In particular, Richard has 3 years experience using PCI's Prof.IT product in his previous position as Operation Manager with Crusteel Ltd. Having managed the project from conception, through installation and onto 'running live', he has valuable, hands on experience of the whole lifecycle from a customer's perspective which will enhance the customer focussed nature of PCI's business.

Prof.IT is a windows product had been specifically designed for the metals stockholding and processing sectors, an industry that PCI had been working in since the early 1980's. The successful launch of PCI's Prof.IT applications has seen installation throughout the country, from small 4 user sites to large multi sites operations.

Richard's specific responsibilities will include User Training, Product Development and Project Management. He is delighted to have joined the PCI team and is looking forward to contributing to the continued success and growth of the market leading software provided by PCI.
